

Career Objective

Dynamic 3rd-year engineering student seeking challenging internship to apply theoretical knowledge and drive innovation. Eager to excel, learn, and contribute in backend development . Committed to making a significant impact and exceeding expectations.

Projects

Health Care Assistance System

Nov 2023- Feb 2024

- Developed a Health Care Chatbot project using Python, Scikit-learn, HTML, and CSS to provide a user-friendly platform for patients to assess their symptoms and receive disease predictions.
- I Integrated machine learning algorithms including Random Forest, Decision Tree, and Logistic Regression to classify diseases based on patient symptoms, enhancing the accuracy and reliability of disease predictions.
- Leveraged Natural Language Processing (NLP) techniques to process and understand patient symptoms inputted via the chat interface, enabling the chat BOT to engage with users conversationally and provide personalized responses.
- Designed and implemented the front-end user interface using HTML and CSS, focusing on creating an intuitive and visually appealing chat interface that facilitates seamless interaction between patients and the chat BOT.
- Conducted comprehensive testing and evaluation of the chat BOT to validate its performance and accuracy in disease prediction, utilizing test cases and simulated patient scenarios to assess its effectiveness in real-world healthcare settings.

Certificates

- Linkedin Learning on HTML, CSS and Javascript.

Skills

Languages: Python3, C++, Html, CSS

Technologies: NumPy, Scikit, Git, MySQL

Tools: Git, VsCode

Operating System: Windows 11, Ubuntu

EDUCATION

KIET Group of Institutions, Ghaziabad— B.Tech

B.Tech - 77.86%(till 5th sem)

Sri Jee Baba Saraswati Vidya Mandir

12th - 84.4% (2021 - 2022)

10th - 92.2% (2019 - 2020)
